R-shield

Antiviral neck brace with nanofiber membrane *

We declare that the original antivirus R-shield / R-shield Light neckerchief: **

- contains a sewn-in RESPILON® nanofiber membrane in the nose and mouth, which blocks
 99.9% of viruses and bacteria;
- The nanofiber membrane meets the mandatory level of filtration efficiency of more than 95% and according to the results of independent testing the measured filtration efficiency corresponds to FFP2 (testing results can be found in issue 12/2020 of the Czech magazine dTest).
 - R-shield is not a medical device or a personal protective equipment (respirator).
 - The statement also applies to custom-made R-shield / R-shield Light anti-virus wrists.
